INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/US02/41515

_						
v.	Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	STATEMENT					
	Novelty (N)		4-6,12-19,23	YES		
		Claims	1-3,7-11,20-22	NO		
	Inventive Step (IS)	Claims	4-6,12-19,23	YES		
		Claims	1-3,7-11,20-22	NO		
	Industrial Applicability (IA)	Claims	1-23	YES		
		Claims	NONE	NO		

2. CITATIONS AND EXPLANATIONS

Claims 1-3, 7-11 and 20-22 lack novelty under PCT Article 33(2), as being anticipated by Bammert.

Regarding claims 1-2, 11, 20 and 22; Bammert discloses an auxiliary device for displacing a payload receptacle of an elevator and evice for monitoring the position and the movement of a cage in a shaft of an elevator in which the position of the elevator cage (14) is determined on the basis of the determination of the position of a plurality of spaced apart color elements (60) attached to an elevator hoistway (16,52).

Regarding claims 3, 7-10, 21; see col. 7, lines 51-64 for camera (42) and col. 8, lines 27-40, for light source (4).

Claims 4-6, 12-19 and 23 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest all the limitations of these claims.

Claims 1-23 meet the criteria set out in PCT Article 33(4), because the subject matter claimed can be made or used in industry.
